L. F. Manufacturing, Inc.

Tanks • Manholes • Wetwells • Piping Systems

LFM offers a full customer service experience. We have a professional sales staff dedicated to assisting you with your project needs. In addition, LFM has its own CAD and design department. From concept to completion, LFM has the people to get the job done. Whether you require plan take-offs, CAD details or submittals; LFM can help.

We market our products throughout the United States utilizing a network of retail distributors and independent representatives. Knowledgeable local representatives are simply a phone call or a click away. Once your fiberglass products have been manufactured, our transportation department will see that it gets to you on time and safely. Our drivers are professionals who understand the importance and demands of your schedule.

Quality Built Right In...

LFM incorporates a comprehensive in-plant testing and quality control program. This insures complete and consistent workmanship in all of our fiberglass products. Each manhole that we build is inspected and tested before it is released for shipping. Our testing procedures include wall thickness reports, raw material analysis, and continuous chemical analysis reports. Individual testing reports are recorded and maintained at our office and are available upon request.

Experience...

LFM has been building quality fiberglass reinforced manholes, manhole liners, wetwells and wetwell liners since 1982. We utilize the latest in chop and filament winding equipment, therefore providing our customers with the highest quality fiberglass products on the market today.

Economical...

Our fiberglass manholes and wetwells are light-weight, greatly reducing delivery and installation costs. Due to the anticorrosive nature of fiberglass, repair and replacement costs due to corrosion are reduced as well.

Strong & Lasting Construction...

Fiberglass wastewater products by LFM are designed and manufactured to meet or exceed all ASTM D3753 standard specifications. In addition to complying with all ASTM standards, our fiberglass manholes carry an H-20 load rating. Our products are engineered to provide you with long and trouble-free service.
