

Bul-Tuf® Agricultural Products

Benefits

Our Bul-Tuf® fiberglass tanks have been produced in Laurel, Montana since 1978. They are currently in service in all western states. Many of the tanks were installed over 30 years ago and are still functional on livestock operations today. They are unaffected by exposure to wind, sun, and freezing temperatures.

■ Strong and Lasting Construction

Bul-Tuf® tanks will not corrode or rust, come as seamless one-piece units, and are pound for pound stronger than steel. Because they are corrosion resistant, the need for extra corrosion protection in the form of paint and internal coatings is eliminated. Delivered without any seams, Bul-Tuf® tanks greatly reduce the risk of environmental contamination due to leaks or spills.

■ Economical

Our Bul-Tuf® tanks represent an excellent value when compared to steel tanks. Bul-Tuf® fiberglass tanks from LFM weigh approximately 60% less than steel tanks. This makes installation easier and less time consuming, saving the customer money in the long run. Also, our fiberglass tanks save money because they are durable and have a longer service life than steel, metal, or poly tanks.

Quality Built Right In

Bul-Tuf® tanks are strong, durable, and designed and manufactured to comply with government specifications, in approved colors. They are delivered to you ready to use with molded-in small animal escape ramps, and without any adapters, major installation equipment, or extra materials. Additionally, they are highly maneuverable, and light enough to be manually installed without extensive piping wherever water is available. Bul-Tuf® tanks are stackable, with tapered sidewalls and stacking blocks that make storage easy.

■ Available Sizes

Bul-Tuf® tanks are available in a wide variety of standard sizes.

Available Standard Tank Sizes

Model	Dimensions	Capacity	Weight
R-16	16' Dia x 2'	3000	450
R-10	10' Dia x 2'	1150	240
R-8	8' Dia x 2'	750	135
R-6	6' Dia x 2'	423	100
T-20	20' x 8' x 2'	2000	650
T-13	20' x 8' x 2'	1243	285
T-10	20' x 8' x 2'	423	110
T-8	20' x 8' x 2'	330	90
T-6	20' x 8' x 2'	240	70
T-4	20' x 8' x 2'	150	50
T-4A	20' x 8' x 2'	120	36
Sheep/Goat Water Tanks			
RS-8	8' Dia x 12 in	365	90
RSE-8	6' Dia x 12 in	470	110
TS-10	10' x 3' x 17 in	220	85

■ Options and Fittings

A full line of options and fittings are available for Bul-Tuf® tanks. Talk to your LFM representative about:

- Add-on lift lugs;
- Non-skid bottoms;
- Super tanks (extra layering for heavy use, such as feedlots, bull pastures, or buffalo operations);
- Additional fittings installed in various sizes;
- Custom modification or fabrication to your specifications;
- Design and engineering support;
- Delivery options.

■ Insulated Bul-Tuf®

All Bul-Tuf® tanks are available in insulated configurations featuring 2" insulation around the entire tank and 2" insulated covers, with optional additional drinkers, top access, and ground tubes.

■ Turnkey Solutions for Custom Applications

No matter what specific agricultural watering challenge you face, LFM can guide you through the entire scope of your project. From CADD services for custom applications through technical support, budgetary estimates, mold fabrication, transportation, and field service after delivery, we are here to serve you. We have manufacturing facilities strategically located throughout the United States to service our clients wherever they are.

■ Professional Delivery

LFM has its own fleet of delivery trucks specifically equipped to transport fiberglass tanks. We employ a professional delivery staff whose primary goal is to provide safe and courteous on-time delivery of our Bul-Tuf® tanks to our valued customers. Bul-Tuf® tanks are much lighter than steel tanks, making them more affordable to deliver and easier to handle during loading and unloading. These factors help to keep delivery costs low.
