

# Fiberglass Pipe and Ducting Systems

## Experience

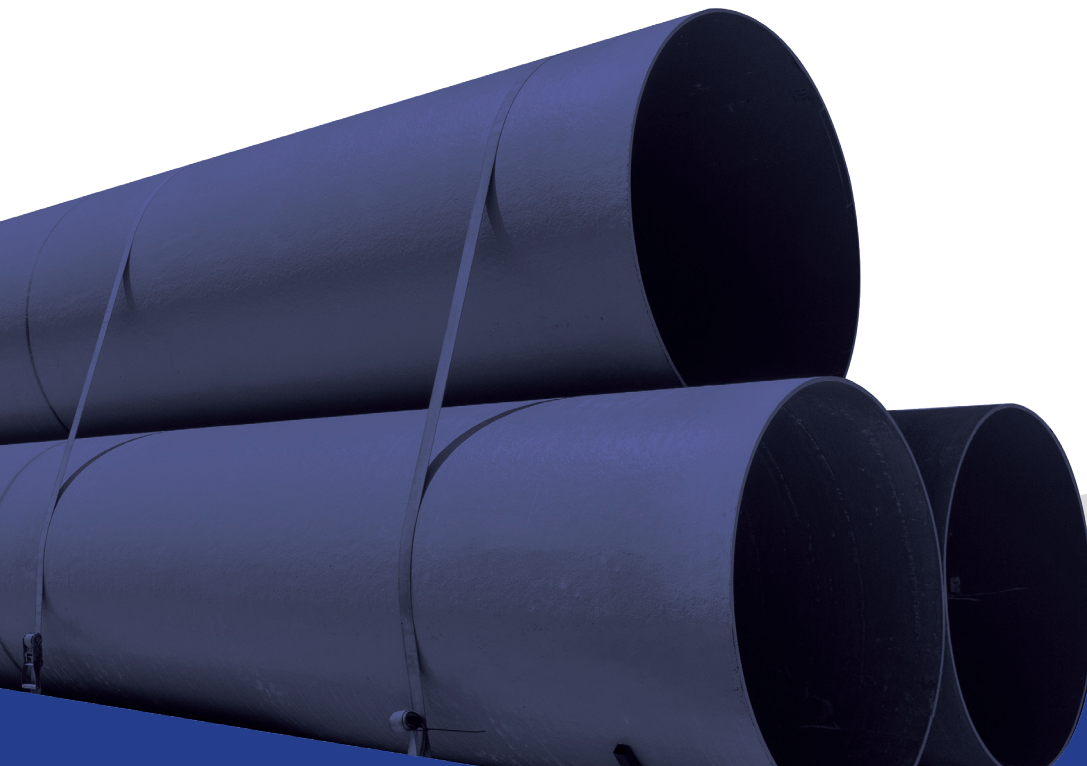

Let us put our experience to work for you. LFM has been building quality fiberglass pipe and ducting systems since 1982. Our fiberglass pipe can be used in both pressure and vacuum applications and is excellent for a wide variety of chemical services including high pressure lines. We use only the finest quality resins and glass fiber in our fiberglass pipe and ducting systems.

## Production Facilities

LFM's main production facility covers over 83,000 ft<sup>2</sup> and is situated on 35 acres just east of Giddings, Texas on highway 290. Giddings is located 50 miles east of the city of Austin. LFM also has a manufacturing location in Karnes City, Texas, and a 120,000 ft<sup>2</sup> east coast production facility in Waycross, Georgia. Our sales staff is friendly and professional and is ready to help with your fiberglass needs.

### ■ Corrosion Free

Fiberglass piping and ducting systems from LFM eliminate the need for extra corrosion protection such as interior painting and cathodic protection systems. Our fiberglass products are corrosion resistant by nature and will provide many years of trouble free service. Over time, this anti-corrosive nature will save money because the need of costly repair and maintenance due to corrosion is minimized.

Fiberglass Structures

### ■ Chemical Resistant and Fire Retardant

A fiberglass piping system from LFM, when fabricated using a specific resin system, can service multiple processes. Each resin type is resistant to a wide range of chemicals. Additionally, a fire-retardant resin system can be used for certain applications.

### ■ Economical

LFM's fiberglass products present an outstanding value when compared to steel or concrete products. Our products have a longer service life than products fabricated from other materials, which translates into replacement cost savings.

### ■ Quality Built Right In

LFM's fiberglass products are designed and manufactured for your specific application. We meet or exceed industry standards to insure long and trouble-free service.

### ■ Professional Delivery

LFM has its own fleet of delivery trucks specifically equipped to transport fiberglass products. This helps to lower delivery costs considerably. We also employ a professional delivery staff whose primary goal is to provide safe and courteous on-time delivery of our products to our valued customers.

### ■ Quality Assurance

At LFM, we stand behind the products we build. We offer a one-year limited warranty on our fiberglass products. Speak to your LFM sales representative for complete details.

Small Diameter Pipe Sizes	
Diameter	Max Length
1"	11' 11"
1.5"	22' 3"
2"	21'
2.5"	21'
3"	22' 5"
